ALLOWANCE

1. The following is an Allowance in response to the communication received on November 17, 2010. Claims 1 and 8 have been amended. Claims 1-3, 5-6, 8-10, 12-13, 29-36 are now pending in this application.

Reasons for Allowance

2. Claims 1-3, 5-6, 8-10, 12-13 and 29-36 are allowed.

3. The following is an examiner's statement of reasons for allowance: None of the prior art of record, taken individually or in any combination, teach, *inter alia*, a method or computer readable storage medium including ...*after accepting a first contract with a first advertiser, accepting a second contract with a second advertiser; wherein the delivery obligations associated with the second contract are such that fulfillment of the second contract would prevent the delivery obligations of the first contract from being fulfilled; one or more computing devices creating a second subset of advertisements by filtering, out of the first subset, based on behindness values computed for the advertisements, advertisements whose delivery obligations are on track to be satisfied; selecting the first advertisement from the second subset of advertisements to include in the slot based, at least in part, on the potential revenue amounts.*

4. The prior art most closely resembling Applicant's claimed invention are as follows: Naqvi et al. U.S. Pub. WO 97/21183 (hereinafter, Naqvi) and Horowitz U.S. Pub. No. 2005/0149396.

Naqvi teaches accepting contracts with advertisers where each contract has certain delivery obligations associated with the advertisements. However, Naqvi does not expressly disclose *...after accepting a first contract with a first advertiser, accepting a second contract with a second advertiser; wherein the delivery obligations associated with the second contract are such that fulfillment of the second contract would prevent the delivery obligations of the first contract from being fulfilled; one or more computing devices creating a second subset of advertisements by filtering, out of the first subset, based on behindness values computed for the advertisements, advertisements whose delivery obligations are on track to be satisfied; selecting the first advertisement from the second subset of advertisements to include in the slot based, at least in part, on the potential revenue amounts.*

Horowitz teaches a throttle value equal to a percentage of time remaining in an advertising campaign divided by a percentage of actual clicks remaining, which is then multiplied by a dampening value. However, Horowitz does not expressly disclose *...after accepting a first contract with a first advertiser, accepting a second contract with a second advertiser; wherein the delivery obligations associated with the second contract are such that fulfillment of the second contract would prevent the delivery obligations of the first contract from being fulfilled; one or more computing devices creating a second subset of advertisements by filtering, out of the first subset, based on*

behindness values computed for the advertisements, advertisements whose delivery obligations are on track to be satisfied; selecting the first advertisement from the second subset of advertisements to include in the slot based, at least in part, on the potential revenue amounts.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Ozer et al. U.S. Pub. No. 2003/0101454 discusses resolving conflicts between newly scheduled ad campaigns and already scheduled ad campaigns;
